

Renew Your Roof With **BioRejuv**

We do things that most roofing companies refuse to do - **we add life**. Our **Revolutionary Bio-Based Solution** penetrates through the shingle, extending the life of your roof with our **5 Year No Leak Warranty!**

WHAT IS BIOREJUV?

BioRejuv uses a **bio-based recycled cooking oil formulation** designed to significantly extend the lifespan of your roof systems. This innovative solution is sprayed directly on your roof, sealing and rejuvenating the shingles.

PRICING

Typical commercial shingle rejuvenation application will run between **25% - 35%** of a full reroof project.

LIQUID APPLIED ROOF RESTORATION

The potential to reduce energy costs while extending the useful life of your roof

Liquid applied roof restoration solutions are a lower-cost option that extends the life of the existing roof, lower overall life cycle cost and eliminates the need for roof tear-off and full replacement.

White, highly reflective elastomeric coatings protect your roof from deterioration caused by heat absorption and UV radiation, provide high tensile strength and elongation with a fully-adhered seamless barrier against corrosive elements that lead to moisture penetration and damaging leaks.

Advantages of Acrylic - Polybrite 71HS

- Acrylics are water-based coatings that affix well to a wide range of roof types including metal sloped roofs.
- Acrylics provide excellent protection, are easy to install and maintain.

Advantages of Silicone - Polybrite 90.1

- Silicone coatings have faster cure times, perform well in wide ambient temperature ranges and are durable enough to withstand ponding water.

Both Acrylics and Silicones can achieve 10 to 20 years system warranty

Polyglass Quality

Polyglass® U.S.A., Inc. is a leading manufacturer of high - quality roofing and waterproofing solutions. Utilizing the most technologically advanced manufacturing processes in the industry, Polyglass operates six state -of- the -art manufacturing facilities.
