

The Most Viewing Area Of Any Vinyl Replacement Window

More Daylight...Up to 40% more.*

Simonton DaylightMax™ windows offer less frame and more glass than most replacement windows. The unique frame design of DaylightMax is more energy efficient, outperforming ENERGY STAR® standards, to help reduce your heating and cooling bills. If architectural styling options are what you're after, Decorum® by Simonton styling choices will make your home stand out with a wide selection of colors, hardware finishes, and decorative glass and grid designs.

DaylightMax...Maximum Daylight, Energy Efficiency, and Styling Options.

A Popular Replacement Window Manufacturer

DaylightMax

DaylightMax windows are the architecturally correct replacement for aluminum windows.

They feature narrow frame profiles and overall symmetrical design.

A shallow 2 7/8" frame depth means DaylightMax windows may not require you to replace existing window treatments... saving you money!

**DaylightMax has 40% more glass than a major replacement window manufacturer in a 31"x 21" Picture window. For a 36" x 36" Slider window DaylightMax provides 20% more viewable area.*

SEE FOR YOURSELF! TAKE THE **Simonton Challenge!**

◀ Old aluminum windows can be hard to open, are inefficient and date your home.

More daylight. More choices.

DaylightMax windows are available in a host of styles, so you can choose the window that complements each opening perfectly. Virtually unlimited configurations allow you to transform your home like you never thought possible.

At Simonton, we understand that when it comes to your home, there is no such thing as a small detail. That's why DaylightMax windows feature many thoughtful details that make a very big difference.

AutoSense™ Lock peace of mind.

The lock is automatically activated when the window is closed, so you always know when your windows are locked. The AutoSense Lock surpasses the nation's strictest forced entry code requirements. The sleek, low-profile design doesn't intrude into the sightline. Color-matched or choose a Decorum finish, it's as attractive as it is strong.

The DaylightMax continuous radius frame has no weld lines. Many competitive brands place unsightly weld lines where the straight legs meet the radius on the frame.

Every Simonton window and door is tested to the demanding AAMA Gold Label Certification Program for product excellence and is covered by an industry-leading Lifetime Limited Warranty.

Custom sizes ensure a perfect fit for virtually any application—even as small as this operable 18" x 8.5" bath Slider.

The Simonton difference is in the details.

- A** A mitered glazing bead provides a neatly finished appearance.
- B** The interlock features the same narrow, low profile design as the frame, for attractive symmetry.
- C** Weep holes are covered by small baffles to keep insects out and to provide a finished look.
- D** Integrated Pull Rails allow you to handle the screen from anywhere along the edge and will never break out like pull tabs can.
- E** Stainless Steel pin axle wheels for ergonomic rolling
- F** Double Strength Glass is standard to reduce thermal and stress cracks. Single strength is 3/32." Double strength is 1/8." Many competitors use single strength.

Single-strength glass vs. double strength glass shown actual size thickness.

3/32" 1/8"

Saving energy is more important than ever.

Conserving natural resources, helping keep your energy costs affordable and making your home comfortable are all reasons that your windows and doors should be as energy-efficient as possible. That's why DaylightMax windows are designed for superior thermal performance. You'll not only notice a difference in the year-round comfort of your home—you'll appreciate the comfort of lower energy costs month after month, year after year.

The truth is in the numbers.

Just as a car's MPG makes it easy to compare the fuel efficiency of different models, a window's U-value makes it easy to compare energy efficiency between different window options. The lower the U-Value, the more efficient the window is. When comparing window options, ask for and compare the U-Value performance.

Energy efficient by design.

Compare DaylightMax with the same Gas, Glass and Spacer options in any competitive window and see the U-Value Advantage for yourself. Be wary of manufacturers who claim better U-Value performance but add costly options to meet DaylightMax performance.

According to the United States E.P.A.:
 "Replacing old windows with ENERGY STAR certified windows **lowers** household energy bills by an average of **12%** nationwide."

LoE Glass Options

LoE glass can help to increase Solar Heat Gain, warming homes in heating dominant climates or to reduce Solar Heat Gain in cooling dominant climates.

FOUR COMPONENTS THAT BO

1
The Glass
 DaylightMax windows feature standard double-strength ProSolar Low E glass. This glass helps block damaging UV rays while letting desirable light stream in. And because the insulating glass unit is more efficient than the frame, DaylightMax windows offer better thermal performance than wide frame windows that have less glass.

2
The Gas
 Argon gas is sealed between the glass panes. This colorless, odorless, invisible gas is six times denser than air and is a far better insulator.

Intercept Spacer is standard on DaylightMax, a rigid U channel design made of Aluminum for **better** thermal performance and increased strength.

Supercept is standard on DaylightMax+, a rigid U channel design made of Stainless-Steel alloy for the **best** thermal performance and increased strength.

BEST THERMAL PERFORMANCE

3 The Spacer

Standard on DaylightMax and DaylightMAX+ windows, includes a U-channel spacer and a series of advanced sealants which maintain an airtight seal.

4 The Frame

The unique minimalistic frame design of DaylightMax is the secret to its industry leading U-Value performance.

= Energy Efficiency

Since the glass, gas and spacer are available to all manufacturers, the real difference in the energy efficiency from DaylightMax comes from the **frame design**.

Step 1 Select your operating style.

Dare to dream.

Replacing your old windows with beautiful Simonton DaylightMax™ windows and doors is the perfect opportunity to transform your home with exciting geometrics, completely new styles or mullied configurations. If you can dream it, you can make it happen with Simonton and DaylightMax.

Step 3 Choose your styling options.

Imagine the possibilities.

DaylightMax™ windows and doors open up an entire world of design possibilities to your home. Decorum® by Simonton, available on DaylightMax, is a portfolio of styling options that allows you to create a look that is distinctively yours. Choose from vibrant exterior colors, hardware cast in distinct metal finishes, decorative privacy glass and virtually unlimited grid options to give your windows distinct architectural style.

Custom exterior colors.

Choose an exterior color that complements your home's existing trim. Or, select a color that provides a striking contrast. Either way, you won't believe the difference a little color will make. *Windows with Decorum exterior colors come with a white or tan vinyl interior, or upgrade to our new black interior.*

If you live in a noisy area, ask about specialty glass designed to reduce unwanted noise infiltration.

"These windows and doors have already shown that they have completely silenced the road noise outside. We live on a busy street and it is now very quiet."

- Simonton California Homeowner

◀ Interior Black laminate is great for modern decor and can also help to contemporize more traditional interiors.

Whoever said a window has to be a simple white square obviously never knew Simonton.

Simonton offers a huge palette of design choices when it comes to improving your view. Whether it be colors, hardware finishes, shapes or sizes, we have just what you're looking for.

▲ Simonton Garden windows feature a large interior area that is perfect for growing herbs or flowers. The unobstructed glass area allows for a great view, and for plentiful fresh air, both sides of the Garden window feature fully functional, easy-open Single Hung windows or Casement windows.

- ▲ Nothing can expand a room and bring the outside in like a Simonton Bay or Bow window. This Bay window features a Picture window in the center, flanked by two operable Casements. The Bay window can be made with 35- or 45-degree angles. Bow windows are comprised of three or more windows mullered at 10-degree increments. Simonton Bay and Bow windows can be made with a variety of operating styles.

Now that you've selected the ultimate windows for your home, may we suggest the perfect patio door?

Simonton patio doors help open living areas, bring the outside in and are an excellent way to make the most of a great view. Whether you choose the elegant French Sliding Patio Door or the sleek Contemporary Patio Door, you'll love the view from here.

The French Sliding Patio Door features a wide stile and rail design that provides the elegant look of a French Rail hinged patio door with the space-saving operation of a sliding patio door.

Patio Door Configurations

Ask your Simonton dealer which Patio Door is right for you.

"We love the view out of our new DaylightMax windows, but when we replaced our old sliding patio door it made the view spectacular!" - *Simonton Idaho Homeowner*

Some doors shown with optional grids and hardware.

The Contemporary Patio Door boasts a sleek, streamlined profile. The broad expanse of glass afforded by a narrower panel frame results in larger sight lines for a clean, unobstructed view.
